Agenda

• What are the potential “showstoppers” to identify before an international trip?

• How to prepare and pre-plan for those challenges and be ready to react to changes in:
  – China
    • ZSPD / Shanghai – Pudong
    • ZBAA / Beijing - Capital
  – Russia
    • UNNT / Novosibirsk - Tolmachevo
    • UUWW / Moscow - Vnukovo
  – Kazakhstan
    • UACC / Astana - Aqmola
My concerns before any international trip
Start by looking at the trip from a macro level

• What do I need to know about the region in general and the countries I’ll be traveling to?
• What information do I need to know about the actual airports we’re operating to?
• I need to know what immediate challenges and potential show-stoppers this trip may have before it gets started!
Pre-trip considerations

• What documents are required?
• What are the permit and operational lead times so I can determine the trip’s feasibility and set expectations with my passengers?
• What sponsor information do I need, if any at all?
• What are the visa requirements? What if our trip is extended? What options do I have?
• If our trip changes, what steps do I need to take?
Pre-trip considerations

- Are there restrictions on traveling between cities/countries?
- Are there security concerns at any destination, or between destinations? (risk assessment)
- Are there cultural considerations needing our attention, or local events/holidays that could affect operations?
- How can I make sure I find good hotel accommodations for the passengers and crew?
Pre-trip considerations

• Which airports meet your operational needs?
• Slot rules/restrictions?
• What are the hours of operation for the airports we are traveling to?
Pre-trip considerations

• How are crew swaps handled?
• What are the CIQ and transportation arrangements for passengers like?
• What can I expect upon arrival from my handler?
